

East Delta University, Bangladesh

Doctors Appointment Web Application

Instructor: Tanvir Azhar

Presented by:

Fatema Lova Khan | Jakia Fathin Muna

Problem & Solution

The Problem

- Long queues & phone calls just to book an appointment
- No easy way to find the right specialist
- Patients forget appointment times
- Doctors can't manage schedules efficiently

Our Solution

- Online appointment booking in minutes
- Browse & filter doctors by specialty
- Smart appointment reminders for patients
- Admin panel for complete schedule control

Key Features

Landing Page

Welcoming home page with featured doctors & specialties

Patient Signup

Quick registration for new patients with profile setup

Secure Login

Role-based login for patients and administrators

Book Appointment

Choose doctor, date & time — confirm in one click

Patient Dashboard

View upcoming & past appointments, edit profile

Admin Panel

Manage doctors, appointments & patient records

How It Works

Patient Flow

Smooth
transitions

App Pages Overview

Home Page

- Hero section with welcome banner
- Doctor search & specialty filter
- Featured doctors listing

Login / Signup

- Clean form-based authentication
- Role selection: Patient / Admin
- Input validation & error messages

Patient Dashboard

- View upcoming appointments
- Cancel or reschedule bookings
- Personal profile management

Admin Panel

- Add / remove doctors
- View all appointments
- Manage patient records

Conclusion

✓ Built a fully functional Doctors Appointment web app

✓ Clean, role-based UI for both patients and admins

✓ Responsive design with smooth CSS animations

✓ Solves real-world healthcare access problems

Future Work

SMS / Email appointment reminders

Online payment integration

Doctor rating & review system

Mobile app version

AI-based doctor recommendation
